THE DETENTION CENTER

The Detention Center of the Family Court of St. Louis County provides for the safe and secure custody of juveniles alleged to have committed an offense that brings them within the jurisdiction of the Court. These juveniles are detained only if it is believed that they present a threat to themselves or the community. They remain in Detention until the Court hears their case or until appropriate alternative arrangements can be made.

DETENTION SERVICES

The Detention Center provides for the basic needs of its residents: shelter, food, clothing and medical care. But just as importantly, the Center's staff provides a wide range of support services intended to help promote the juveniles physical, social and emotional development. These services include drug and alcohol counseling, arts and crafts, self-help programs, educational and vocational services, fitness sessions, voluntary religious services, recreational programs and many other activities.

The Special School District of St. Louis County provides educational programming for Detention residents both during the regular school year and during the summer months. Teachers are specially trained to work with adolescents who have learning and behavior problems.

The Department of Public Health of St. Louis County provides a registered nurse, a nurse practitioner and visiting

physician. The Center's medical program is accredited through the National Commission on Correctional Health Care.
